Copies of the listed documents, together with English-language abstracts of the non-English-language documents marked with an asterisk (\*), are attached. Applicant does not concede that the identified documents, or any of them, constitute prior art within the meaning of the United States patent laws. Pursuant to 37 C.F.R. 1.97(e), Applicant states that each of the listed documents was cited in an International Search Report issued by the European Patent Office on May 19, 2003 (*i.e.* not more than three months ago) for a corresponding patent application filed under the Patent Cooperation Treaty. Applicant believes German Patent Document No. 9304753, identified in the International Search Report as among documents not considered to be of particular relevance to the claims pending in the PCT application, nevertheless conceivably could be relevant because it appears to disclose a seat with a tray table.
